Summary

Full-stack developer and coding tutor with 4 years of work experience. Fullstack back-end NodeJS and Express, front-end javascript/typescript developer, preferably with typescript.

Objective

As a developer, my objective is to make scalable, easy-to-maintain applications and services

SKILLS

- **Frontend Development:** HTML, CSS, Javascript, React, NextJS, Typescript, Redux-Toolkit, Zustand, React-Query, Tailwind CSS, ChakraUI, and Mantine.
- **Backend Development:** NodeJS, Express JS, Restful API, Golang, Fiber.
- **Mobile Development:** React Native.
- **Cloud:** AWS.
- **Database:** MySQL, MongoDB, and PostgreSQL.

EXPERIENCE

AGIT Solutions, Abuja - *FullStack Developer*

I oversaw the development of highly scalable management systems and e-commerce applications, demonstrating expertise in front-end and back-end technologies.

Conducted code reviews and provided helpful feedback to maintain high-quality code standards.

OCTOBER 2022, - PRESENT

GeekOn Technologies, Abuja - *Junior Frontend Developer*

Assisted in optimising frontend applications to increase performance, resulting in making the applications faster and more user-friendly. Which led to higher engagement, more conversions, and increased revenue.

I also worked together with the UX/UI team to develop visually appealing and intuitive user interfaces.

January 2020 - AUGUST 2021
